

ABSTRACT

BUTTON OPERATED GEAR SHIFTING

The main objective of this concept is used to apply the gear by using automation system in automobiles. This is the new innovative model mainly used for the vehicles to control the vehicle. In this project we design the automatic gear changing mechanism in two wheeler vehicles by using the electromagnet devices. This is very useful for the gear changing mechanism in automobile vehicles. By using this we can easily control the vehicle and improve the performance of the vehicle also we can avoid the wear and tear of the gear
